DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the limitation “consumes a single location ... that a passenger seat would otherwise occupy” is vague and indefinite. There is no antecedent basis for a “passenger seat” so it is not clear what type or size of seat is implied. It is not even clear how limiting “would otherwise occupy” since this has the form of a method or functional limitation, not a structural limitation.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 9-12, and 14-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Canta et al (6,056,239).

See especially Figure 11 and the stairs providing access to the upper module.

5. Claims 7, 8, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3644

6. Claims 20-27 are allowed.

7. Applicant's arguments filed 8-30-04 have been fully considered but they are not persuasive. Applicant's primary argument appears to be that Cantu et al fail to disclose the invention because the modules of Cantu et al are not located in "an overhead crown area of the mobile platform". Applicant argues that one of ordinary skill in the art would consider the crown area to be between the outer structure of the mobile platform and the ceiling of the mobile platform. However, there is no indication within the specification that this is the required definition of "crown area" and Webster's II New Riverside University Dictionary (Houghton Mifflin Company, copyright 1984, 1988) offers a definition of "crown" as "The highest point." Cantu et al clearly shows their privacy modules in an area at the "highest point" of the aircraft cabin, i.e. near the ceiling. It is entirely proper to apply this definition of the term in considering the scope of the claim language.

Cantu et al is believed to anticipate the structural limitations of claim 2, especially in view of the above 112 rejection. The stairway to an upper module occupies a small portion of a lower module, and it appears inherent that this stairway would only take up the space required by a single seat of the same size, or larger, than the size of the stairway. Also, the limitations of claim 4 is met by Cantu et al since the requirement that "each privacy module is physically associated with at least one specific seat in the passenger cabin" is met by the ladder of the upper module being physically connected to the seat module directly below a particular upper module.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3644

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
